DESCRIPTION

The Saxdor 400 GTC (2025) is ready for the season. Modern, dynamic and thoroughly considered, it pairs a sporty character with the comfort of a full cruiser. It is powered by two Mercury V10 400R engines in a stylish white finish (2 x 400 hp) for impressive performance and high speed. A spacious wheelhouse with panoramic glazing and a sliding roof fills the interior with light and a sense of open space, while sliding glass doors provide a smooth transition between saloon and cockpit. Inside there is a comfortable dining area and a full galley; two cabins and a heads with shower on the lower deck make the boat suitable for longer passages as well as day trips. Side terraces expand the space by the water, and modern control and navigation systems ensure confident handling. Lying in Istanbul and fully ready for use.
